

36TH ANNUAL SALE

THURSDAY 10TH OCTOBER 2024

**EWES FROM 11.30AM
RAMS FROM 1PM**

David & Michelle Pipkorn

detpagrove.com

WELCOME TO OUR 36TH ANNUAL SALE

We had an immensely even 2023 drop and are very pleased to offer these high-quality drafts to industry. We believe they will again have terrific results for commercial producers and will complement and improve many stud breeding operations with their overall correctness and balance of performance traits.

In preparation for sale, our stud ram team this year has been managed as usual, the stud ewes have had no grain feeding and the flock rams were on grain from April until adequate pasture was available in June.

Again, a big congratulations to all clients who have enjoyed such tremendous success with our genetics this year.

We thank you for your continued support and wish you all success with your bidding today.

David & Michelle

WHITE SUFFOLK STUD HISTORY

Founded in 1981, we continually aim to improve performance and productivity on sound structured sheep, and so provide high quality flock rams to prime lamb producers, and sound breeding stock to stud breeders.

Balanced breeding strategies have been set in place to achieve these goals. Advanced technology has been utilized - Artificial Insemination to introduce useful genetics and Lambplan for performance assessment.

We maintain a small but very influential appendix breeding sector within the stud. We consider maintaining accurate and detailed records alongside sound management practices essential.

Participation in health and quality assurance programs such as Ovine Brucellosis Accreditation and Ovine Johnes Disease, Market Assurance Program and DNA testing have been keenly sought.

To help speed our genetic progress, generation turnover is enhanced by using the best DNA analyzed ram lambs (7 months old) each year and lambing down our ewes from as young as 12 months.

Various embryo transfer programs have also been undertaken to make best use of our top ewes. High lambing percentages are also encouraged in the stud and in the last few years we have realized above 160% live lambs.

Our progress is measured by - Lambplan through across-flock SBVs, the results of trial work conducted both within flock and participation in public ones, client feedback and the performance of our stock within other studs.

To see our sires featuring at the top end of Lambplan rankings and the outstanding show, sale and production results by our clients gives us great confidence to continue our direction diligently.

TOTAL CARCASE PRODUCTION (TCP)

Indexes generally help producers select animals for use within a breeding program when there are a range of traits of economic or functional importance. This ensures that genetic gain in one trait is not made in isolation from other traits. Using indexes in ram purchasing decisions allow producers to make balanced genetic progress towards more profitable sheep.

The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight, muscling fat levels and lambing ease, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

A basic indication is this TCP scale.

BAND %	1	10	20	30	40	50	60	70	80	90
TCP	164	156	152	148	145	142	139	135	131	125

The performance information presented in this catalogue is based on the 1st August 2024 analysis

We strongly encourage the integration of specific ASBVs to target market objectives, together with structural assessment and overall visual appraisal.

For more detail on any Detpa Grove animals, enter search site at address; <https://search.sheepgenetics.org.au/search/dashboard>, select buyer, select Terminal-All, select individual animals. Submit our stud name/flock code 230043 and click Detpa Grove option then enter the Animal ID in 6 digits (eg.220123).

There have been some enhancements of all ASBVs and Indexes provided by Lambplan. To re-calibrate your selection criteria please study the latest percentile bands at <https://search.sheepgenetics.org.au/report/percentile-bands?flockCode=&db=2&traits=1>.

NOTES

DISCLAIMER;

Whilst the highest level of care and attention has been paid to accuracy in the collection of all data and the compilation of this catalogue, neither the vendors nor the selling agents assume any responsibility for the correctness, use or interpretation of the information of animals included in this sale catalogue. If you find a discrepancy, please contact the stud principal for clarification of the information.

THANK YOU

A sincere thank you to all buyers and underbidders for your support today.

We wish you every success with your purchases and look forward to hearing of your future achievements.

Further, we wish to thank all those who helped in the lead-up and during the sale; your ongoing assistance is very much appreciated.

Sincerely,

The Pipkorn Families
